

FIREFIGHTER FOR A DAY
TEAM BUILDING
Wells House & Gardens

Intro

Get a debrief of the fire engine and wear the full Firefighting PPE (Personal Protective Equipment).

Learn about all the equipment on board the vehicle and operate certain pieces including the famous “Jaws of life” used to rescue people from road traffic accidents with the help of your supervisors.

Carry out exercises with the Firefighting hose, Water Branches and Fire extinguishers!

Candidates will be shown proper procedure in operating a Fire Extinguisher. Whilst this will be a fun exercise, candidates will also take away a valuable lesson in Fire Safety.

Breathing apparatus

Candidates will get a unique opportunity to work with SCBA (Self Contained Breathing Apparatus), a highly specialist piece of equipment used by firefighters entering into what would be an un-survivable atmosphere.

Smoke filled room

During a real life incident Firefighters would have to make their way through smoke filled rooms searching for casualties. This will be recreated using artificial smoke and teams of 4/5 will enter the smoke filled area and work together to find and rescue casualties which in this case will be training dummies.

This exercise is a true team effort, There will be a team leader and your success will be reliant on how well you communicate with each other.

One major point is that you no longer have your sense of sight and are now fully dependent on hearing, touch and good teamwork.
